

Core Alignment Fusion Splicer 905

Designed to keep you going

True Core Alignment

1. Core Alignment Technology

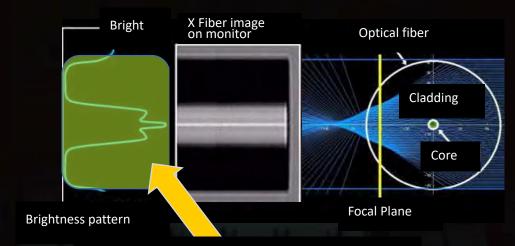

The 90S fusion splicer has high precision lenses which provide accurate core to core alignment regardless of core-cladding concentricity error. Also, the lenses allow the splicer to discriminate between fiber types.

2. Advanced Image Processing Technology

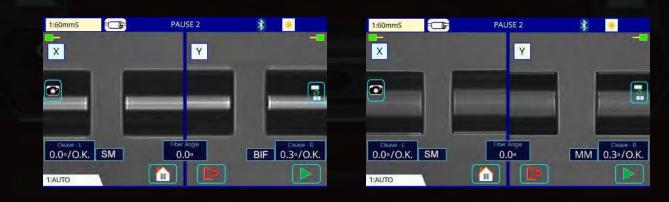

The 90S possesses advanced image processing technology which analyzes the profile of the fiber image as a brightness pattern. The 90S finds the true core position and achieves the consistent lower splice loss.

Analyzing the Brightness pattern

3. Fiber Discrimination Function

The 90S fusion splicer automatically identifies the optimum arc discharge parameters in accordance with the fiber type.

Faster Automation

The faster automated features of the 90S fusion splicer reduce installation times. With this splicer, an operator can complete the entire splicing process from splicing to heating without touching the 90S and only moving the fiber.

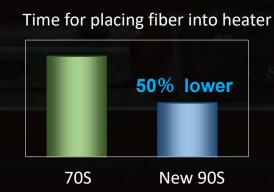

The fiber retention clamps support the automated operations. When the sheath clamps open automatically after splicing, the fiber retention clamps gently hold the spliced fiber to keep it from flying out. The retention clamps release when the fiber is lifted by the operator.

Fiber retention clamp

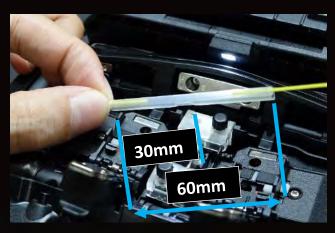

User Friendly

1. Easy Fiber Protection Sleeve Positioning

The shape of the sheath clamp is optimized for the 60mm length protection sleeve. The length from splice point to the edge of the sheath clamp is 30mm. Therefore, it is easy to center the protection sleeve over the splice by using your finger as the reference splice point.

2. Carrying Case

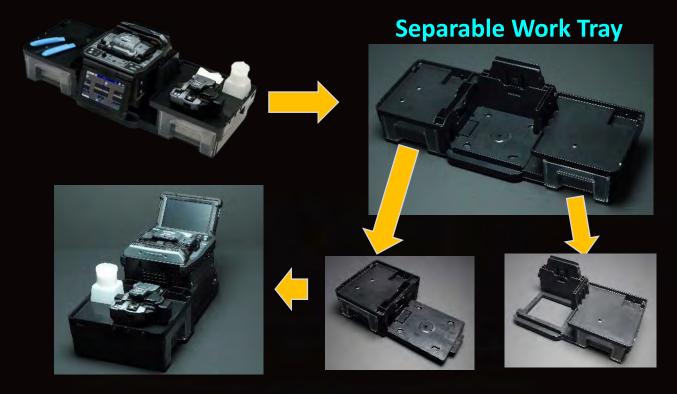

There are multiple ways to utilize the 90S carrying case. The 90S is ready to use just by opening the case, but it is also possible to use the 90S on top of the carrying case or only with the work tray depending on the work environment.

User Friendly

3. Work Tray

The newly designed work tray has many functions. There are two drawers for storage, and the drawers are large enough to store tools or battery packs. Also, the work tray can be divided in two, so it is configurable to fit your work space.

Plenty of space in carrying case

Cleaver & Stripper

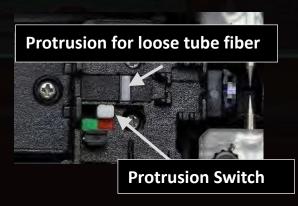

Battery packs

Large storage space under work tray

4. Loose Tube Compatibility

The sheath clamp of the 90S fusion splicer is compatible with loose tube fiber. The Protrusion part on of the sheath clamp for loose tube fiber engages or retracts by simply changing the switch position with your finger.

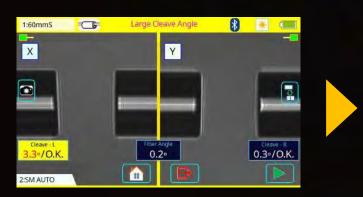

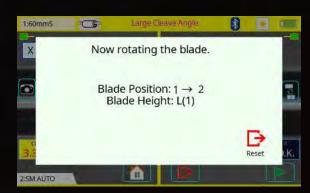

Active Blade Management Technology

1. Automatic Blade Rotation

The 90S fusion splicer and CT50 fiber cleaver are enabled with wireless data connectivity. This capability allows automatic cleaver blade rotation when the splicer judges the blade is worn. Also, the 90S fusion splicer can connect to two CT50s simultaneously.

2. Blade Life Management

The 90S fusion splicer displays the remaining blade life and informs the user when a blade height change, position change, or new blade is required.

Standard Package

90S Standard Package

Description	Model No.	Qty
Core Alignment Fusion Splicer	90S	1pc
(1) Battery Pack*	BTR-15	1pc
(2) AC Adapter	ADC-20	1pc
(3) AC Power Cord	ACC-14, 15, 16 17or 18	1pc
(4) USB Cable	USB-01	1pc
(5) Fusion Splicer Strap	ST-02	1pc
(6) Electrodes (spare)	ELCT2-16B	1pair
(7) Fiber Holder Set Plate	SP-03	1pair
(8) Carrying Case	CC-39	1pc
(9) Work Tray Left	WT-09L	1pc
(10) Work Tray Right	WT-09R	1pc
(11) Work Tray J-Plate	JP-09	1pc
(12) Tripod Screw	TS-03	2pcs
(13) Carrying Case Strap	ST-03	1pc
(14) Alcohol Dispenser	AP-02	1pc
(15) Quick Reference Guide	QRG-02-E	1pc
Single Fiber Stripper	SS03 or SS01	1pc
Optical Fiber Cleaver	CT50	1pc
(1) Fiber Scrap Collector	FDB-05	1pc
(2) Fiber Setting Plate	AD-10-M24	1pc
(3) Case (for Cleaver)	CC-37	1pc
(4) Hexagonal Wrench	HEX-01	1pc

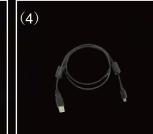

* Please follow IATA regulation when shipping the battery by air.

90S Options

Item	Model	Remark		
Fiber Setting Plate	AD-50	Max. 3mm coating diameter		
	FH-70-200	200µm coating diameter		
	FH-70-250	250µm coating diameter		
Fiber holder	FH-70-900	900µm coating diameter		
	FH-FC-20	900µm in 2mm diameter cable		
	FH-FC-30	900µm in 3mm diameter cable		
DC Adapter	DCA-03	Connect AC adapter not through battery		
	DCC-20	Car cigar socket to BTR-15/DCA-03		
DC power cord		Car battery to		
20 perior soru	DCC-21	BTR-15/DCA-03		
Transfer Clamp	CLAMP-DC-12	Transferring drop cable on work tray		
J-Plate	JP-10	Attaching to splicer, not to work tray		
	JP-10-FC	JP-10 with fiber clamps		
	FP-03	60mm Max. 900µm coating diameter		
Protection sleeve	FP-03(L=40)	40mm Max. 900µm coating diameter		
	FP-03M	FP-03 with non-magnetic material		

Note

*1: Cleave length range depending on fiber type

5 to 16mm : 125μm cladding dia. and 250μm coating dia.

10 to 16mm : $125\mu m$ cladding dia. and 400 or $900\mu m$ coating dia.

5 to 10mm: 80μm cladding dia. and 160μm coating dia.

- *2: Measured with a cut-back method relevant to ITU-T and IEC standard after splicing Fujikura identical fibers. The average splice loss changes depending on the environmental condition and fiber characteristics.
- *3: Measured at room temperature. The definition of splice time is from the fiber image appeared in LCD monitor to the estimated loss displayed. The average splice time changes depending on the environmental conditions, fiber type, and fiber characteristics.
- *4: Measured at room temperature with the AC adapter. The heat time is defined from the start beep sound to the finish beep sound. The average heat time changes depending on the environmental conditions, sleeve type and battery pack condition.
- *5: The electrode life changes depending on the environmental conditions, fiber type and splice modes.
- *6: Test condition
 - (1) Splice and heat time: 2 minutes cycle
 - (2) Using the splicer power save settings
 - (3) Using a not degraded battery
 - (4) At room temperature

The battery capacity changes when testing with different conditions from the above.

- *7: The battery capacity decreases to a half after approx. 500 discharge and recharge cycles, The battery life is shortened further when using outside of the storage temperature range, operating temperature range, if completely discharged by storing for a long time without recharging.
- *8: Bluetooth® mark and logos are the registered trademarks of Bluetooth SIG, Inc.

CT50 Options

Item	Model Name	Remark	
Fiber Setting Plate	AD-50	Optional fiber setting plate	
Blade	CB-08	Blade for replacement	
Clamp Arm	ARM-CT50-01	Clamp arm with anvil for replacement	
Fiber Scrap Collector	FDB-05	Spare scrap collector	
Side cover	SC-CT50-01	Side cover instead of scrap collector	
	SPA-CT08-10	Cleave length 10mm	
Spacer	SPA-CT08-09	Cleave length 9mm	
	SPA-CT08-08	Cleave length 8mm	

Notes

- *1: When the cleave length is less than 10mm, the coating diameter should be 250µm or less. Also, a blade height adjustment is required before cleaving. The average cleave angle is worse than the specification when the cleave length is less than10mm.
- *2: Measured with an interferometer at room temperature, not with a splicer. A new blade was used to cleave both the single fibers and 12 fiber ribbons. The cleave length is set from 10 to 16mm. The average cleave angle changes depending on the environmental conditions, blade condition, operating method, and cleanliness.
- *3: The blade life changes depending on the environmental conditions, operating method, and the fiber type cleaved.
- *4: Measured in a condition when closing the lever.
- *5: Bluetooth® mark and logos are the registered trademarks of Bluetooth SIG, Inc.
